Statement on the TSCA (Toxic Substances Control Act) regulation to reduce and prevent potential environmental damage from chemicals (PBT chemicals)

The EPA (Environmental Protection Agency) decided on 6 January 2021 that some persistent, bioaccumulative and toxic (PBT) chemicals can no longer be sold or used. The TSCA regulation was expanded to include these chemicals accordingly. This takes measures to reduce and prevent harmful environmental effects.

After a detailed examination of the TSCA regulation in our company, we inform you about the following:

PEAK-System Technik GmbH always produces its products according to the currently valid regulatory requirements. Thus, PEAK-System Technik GmbH guarantees compliance with the requirements for environmental and health safety.

According to the current state of knowledge, our products are free of chemicals listed in the TSCA regulation. This considers the TSCA list from the EPA as of February 2022. If we receive any deviating information from this, we take the obligation very seriously to pass on the information and inform our customers immediately and unsolicited.

Darmstadt, 08 March 2023

Uwe Wilhelm, Managing Director
